Restart this Space

Click this button to trigger a restart of your Space.

Restart space

Factory rebuild

Click this button to trigger a factory rebuild of your Space. This will invalidate Docker layer caches and rebuild your space from scratch, reinstalling all dependencies.

Factory rebuild

Dev mode NEW

Dev mode allows you to remotely access your Space using SSH or VS Code. Learn more.

Upgrade to PRO to enable Dev Mode.

Enable dev mode

Change Space visibility

This Space is currently **public**. Anyone on the internet can see this Space. Only you (personal Space) or members of your organization (organization Space) can commit.

Make private

Custom domain NEW

Define a custom domain to host your Space. The custom domain must be a valid DNS name. Learn more.

yourdomain.example.com

Upgrade to PRO to enable Custom Domain.

Submit

Rename or transfer this Space

All links to this Space will automatically redirect to the new location, including git operations. However, to avoid confusion, we recommend updating any existing local clones to point to the new repository URL. To do so, you can use the following command:

```
git remote set-url origin {NEW_URL}
```

New owner: prayphnadeak / New name: New Space name

I understand, move this Space

Community contributions
